First Batch of Service Providers to Achieve Three Service Quality Recognitions of ISO 27001, ISO 20000 and ISO 9001 in the Greater China region

HONG KONG, Feb. 15, 2011 /PRNewswire-Asia/ -- DYXnet, Greater China's leading ICT (Information and Communications Technology) service provider, proudly announced its achievement of ISO 27001:2005 - the world's highest accreditation for information protection and security, for its provision of ICT services, including Dedicated Hosting and Co-location. According to the International Organization for Standardization (ISO), the standard provides a model for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving an Information Security Management System. The Company was also conferred ISO 20000:2005 & ISO 9001:2008, making DYXnet to be the first batch of ICT service providers with three certifications in the Greater China region.

"We are honored to obtain ISO 27001 certification, marking DYXnet to be one of the first batch of service providers in Greater China to get ISO 27001, ISO 20000 and ISO 9001 certifications. We are striving for the excellence in building fundamentals in operation and information security. ISO 27001 acknowledges our efforts to achieve international standards in line with our best industry practices," said Lap Man, Founder and CEO of DYXnet. "With the increasing concerns of enterprises on the security issues on Dedicated Hosting, Co-location and Cloud Dedicated Hosting services, our ISO certifications can help enhance clients' trust and confidence in selecting DYXnet's services in our IDC with peace in mind."

ISO 27001 provides guidelines for a risk assessment and management process and ensures a secure infrastructure, covering DYXnet's Hong Kong offices and two IDCs located in Hong Kong, namely Tsuen Wan and San Po Kong as well as our Network Operations Centre (NOC). The Company also implements stringent security measure to safeguard our information to prevent both internal and clients' information leakage.

Wallace Ng, Group Vice President, Customer Service, said, "I am very delighted to be the chief project-in-charge of all ISO certifications. The attainment of the ISO certifications can bring in comprehensive enhancements in our information security, service management as well as quality control. Leveraging on our state-of-the-art IT infrastructure, we are fully committed to safeguarding our clients' information through security measure, operational security management and 24/7 monitoring. We understand the importance to take responsibility of the information we hold. We ensure our staff members of all levels are well-trained to handle clients' information in a confidential and secure manner."
